

Cape Coral, FL, where our Gulf Coast Village senior living community is located, was severely impacted by Hurricane Ian as was Ft. Myers, FL where The Preserve is located. All together, these communities house over 300 vulnerable seniors, including nursing home, assisted living and memory care residents. I am proud to say that our team was VERY well prepared and while the power is out and cell service remains intermittent, we have confirmed that residents and staff are all safe. We are executing all of our hurricane and disaster plans at this time after Hurricane Ian. All residents continue to shelter safely in place within the community with ample supplies. We do not have power, and the community has experienced damage. Currently you cannot visit the community. We know there is a great deal of concern, but please let staff focus on keeping all of our residents safe. Please check back here for updates.
